

Please reject the NAB's petition 04-160. I am very happy with my paid subscription to XM Radio which includes local traffic and weather information. I think XM provides me with a large variety of radio and I truly enjoy that. That's why I bought a radio and pay my subscription each month. I think the FCC would be acting inappropriately by disallowing XM Radio to offer local information. Please do not make any changes to the current law. I travel a lot and enjoy the convenience of being able to always pick up a good station via XM Radio. I can't see any viable reason the FCC would have to limit XM Radio's content offering. Sincerely,
James R. Beddingfield
Houston, TX
